

```
def fact_rec(n):  
    if n==0 or n==1:  
        return 1  
    else:  
        return n*fact_rec(n-1)  
  
number =2  
res=fact_rec(number)  
print("The factorial of{}is{}".format(number,res))
```
